

Installing Apps from your Website

Joe Bologna
September 24th, 2013

Create an Archive

- Select iOS Device in Xcode
- Select Product/Archive from the menu bar
- Click on Distribute in the organizer
- Select Save for Enterprise or Ad Hoc
- Click Next
- Select your provisioning profile
- Click on Export
- Click the Save for Enterprise Distribution box
- A save as box and a bunch of fields will appear, see next slide

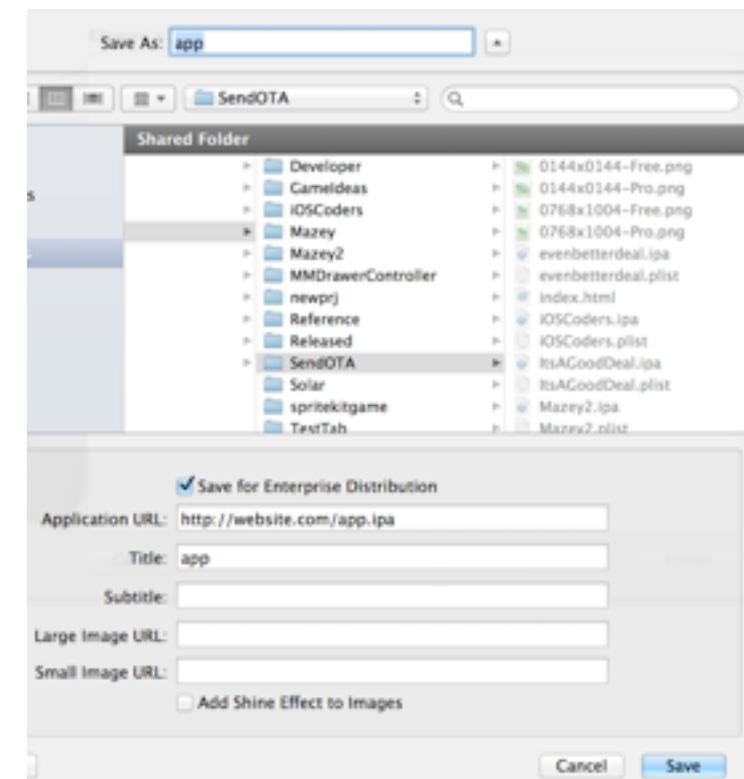

Validate...

Distribute...

Populate the .plist and save the .ipa

- Select the folder to save the files into.
- Enter the following into the remaining fields:
 - <http://website.com/app.ipa>
 - app
 - *you can skip the rest of the fields*
- Click on Save

Upload the Files

- Create this web page

```
<html>
<head>
  <title>OTA</title>
  <meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1">
  <meta name="viewport" content="width=device-width, initial-scale=1.0, maximum-scale=1.0, user-scalable=no" />
</head>
<body>  <a href="itms-services://?action=download-manifest&url=http://website.com/app.plist">
Download app
  </a>
</body>
</html>
```

- Upload the .html, .ipa and .plist files to your website

Install the App

- Using Safari on your phone, visit <http://website.com/webpage.html>
- Tap on Install
